Mr. Neil Simmons
San Rafael Resource Area
U.S. Bureau of Land Management
125 S. 600 W.
Price, UT 84501

Dear Neil:

The following information is given in response to the questions listed in a letter we received from the Area Manager dated May 16. We trust that this information will help clear up any further questions.

Diamond K Gypsum has been producing gypsum in area B1 designated on attached map. DKG would like to amend the plan dated February 4, 1997 for B1. There is approximately 1/4 of an acre mined in B1. We have depleted that source. Instead of continuing in B1 in the easterly direction as the plan dictates we would like to go west into an area we will designate B2 on the same map. The disturbance in this area will be considerably less than if we continue in B1. This plan for B2 area will maintain the approximate 3 acre disturbance as stated in amendment dated February 4, 1997.

The access road shown in the diagram with the Amended Plan of Operation dated February 4, 1997 used for B1 plan will also be used for B2 plan. The access road will not be changed. The measurements for this road are on the diagram with the Amended Plan dated February 4, 1997.

The top 6" of topsoil will be placed on the south side of B2. The remaining overburden will be placed on the west side of B2.

Thank you for your attention into this matter. We hope this information will help clarify the letter you received from John Welsh, Sr. dated April 16, 1997. If you have any further questions please feel free to contact me.

Thank you,

Phillip Palmer
President
